Office Order

Startups working on renewable energy would engage in reducing carbon footprints through a renewable and sustainable source of energy using clean technologies such as solar energy, wind energy, hydro energy, tidal energy, geothermal energy biomass energy etc.

Startups working on climate change would engage in the areas of eco-friendly and/or climate-friendly technologies/solutions that help in reducing and offsetting carbon emissions or increasing the green cover of the region.

Startups working on sustainability would engage in green and sustainable practices along with next generation cutting edge technologies, processes or solutions that are enabling the world at large to recover from years of overuse such as improving soil health, protection of endangered species, clean technologies for alternative energy sources, etc.

(Shikhar Saxena)
